

VERISIGN™

DATA SHEET

VERISIGN® IDEFENSE® FRAUD MITIGATION SERVICES

AS MALICIOUS THREATS CONTINUE TO PROLIFERATE THROUGH INCREASINGLY FREQUENT AND COMPLEX MALWARE AND PHISHING ATTACKS, ORGANIZATIONS REQUIRE THE ABILITY TO MITIGATE AND MANAGE RISK TO GUARD CRITICAL INFRASTRUCTURES, SENSITIVE DATA, BRAND REPUTATION, AND TRUST AMONGST CUSTOMERS AND BUSINESS PARTNERS.

Effective and timely fraud prevention and risk management requires advanced intelligence to allow prevention and shutdown of phishing and malicious code attacks, and to permit visibility into known malicious IPs, victims, or infected IP lists. In addition, organizations require advanced intelligence to provide insight into malicious code drop sites and underground marketplaces used to buy and sell stolen credentials and to recover stolen credentials to mitigate the impact and potential loss.

Verisign® iDefense® Fraud Mitigation Services offer mitigation solutions and response strategies that assist security practitioners in managing risk involved in online fraud. By monitoring known malicious IPs and preventing phishing and malware attacks, Verisign iDefense delivers services and strategies that improve fraud response. Specific Verisign iDefense

Fraud Mitigation Services include:

- Comprehensive solutions built on years of experience and industry alliances to quickly detect and shut down traditional phishing and malware-based phishing attacks
- Daily intelligence updates allowing customers to monitor address space and block traffic from malicious IPs
- Access to Verisign iDefense intelligence focused around fraud mitigation that includes trends in credential theft and recovery

Verisign iDefense analysts have a unique, powerful focus with years of experience in dealing with malicious actors in underground marketplaces. Verisign iDefense has served financial services, retailers, and e-tailers for many years, and has built a set of tools to successfully and proactively find and eliminate fraud at the source.

PHISHING AND MALICIOUS CODE ATTACK PROTECTION

Leveraged by an extensive network of industry alliances, Verisign iDefense Phishing Shutdown and Verisign iDefense Malcode Takedown Services emphasize prevention while quickly detecting and effectively shutting down attacks that are underway.

REPUTATION PROTECTION THROUGH PERSONALIZED PROFILES AND DELIVERY NOTIFICATION

Available through the Verisign iDefense portal, customers can receive notifications anytime, on any device, anywhere in the world. As Verisign analysts discover new vulnerabilities, the Verisign iDefense portal delivers information to customers through customizable profiles that give the right people in an organization the information to proactively mitigate vulnerabilities

VERISIGN™

before malicious actors can exploit them.

PROTECTION AGAINST ONLINE FRAUD

Verisign iDefense IP Reputation Feed provides a time-sensitive and comprehensive IP Blacklist to help customers monitor their address space, search for malware internally, or block IPs which may be used in fraudulent transactions.

ABOUT VERISIGN® IDEFENSE® SECURITY INTELLIGENCE SERVICES

Verisign iDefense Security Intelligence Services gives information security executives access to accurate and actionable cyber intelligence related to vulnerabilities, malicious code, and global threats 24 hours a day, 7 days a week. Verisign iDefense in-depth analysis, insight, and

response recommendations help keep businesses and government organizations ahead of new and evolving threats and vulnerabilities.
